Immunochemistry

Regional Editors

Prof. DAN H. CAMPBELL (Chairman), *California Institute of Technology, Department of Chemistry, Pasadena, California, U.S.A.*

Prof. FRED KARUSH, *Department of Microbiology, School of Medicine, University of Pennsylvania, Philadelphia, Pennsylvania, U.S.A.*

Prof. ALAIN BUSSARD, *Institut Pasteur, 25 rue du Docteur Roux, Paris, France.*

Prof. HENRI ISLIKER, *Université de Lausanne, Institut de Biochimie, 21 rue du Bugnon, Lausanne, Switzerland*

Editorial Board

FREDERICK ALADJEM
Los Angeles, California

R. BACKHAUSZ
Budapest, Hungary

ELMER L. BECKER
Washington, D.C.

O. G. BIER
Sao Paulo, Brazil

JOHN R. CANN
Denver, Colorado

MERRILL W. CHASE
New York, N.Y.

B. CINADER
Toronto, Canada

R. R. A. COOMBS
Cambridge, England

WALTER B. DANDLIKER
La Jolla, California

HAROLD F. DEUTSCH
Madison, Wisconsin

SHELDON DRAY
Chicago, Illinois

RICHARD S. FARR

4/5 FITZROY SQUARE, LONDON W.
24 RUE DES ECOLES, PARIS V

Contents of Volume 3

January

R. Heimer and *Francoise M. Levin:* On the distribution of rheumatoid factors among the immunoglobulins 1
Harriet S. Tenenhouse and *H. F. Deutsch:* Some physical-chemical properties of chicken γ-globulins and their pepsin and papain digestion products 11
G. L. Choules and *S. J. Singer:* On the heterogeneity of the light chains of rabbit antibodies 21
K. C. Robbins and *L. Summaria:* An immunochemical study of human plasminogen and plasmin 29
L. Levine, Eleanor Wasserman and *W. T. Murakami:* Immunochemical studies on bacteriophage DNA—VI. Renaturation of T_4 DNA 41
J. Lenard and *S. J. Singer:* Specificity of affinity labeling of anti-DNP antibodies 51
G. Sitomer, R. M. Stroud and *M. M. Mayer:* Reversible adsorption of C′2 by EAC′4: role of Mg^{2+}, enumeration of competent SAC′4, two-step nature of C′2a fixation and estimation of its efficiency 57
K. C. Robbins, Helen Wu and *Betty Hsieh:* Physical, chemical and immunochemical studies on a low ragweed pollen antigen 71
Communication to the Editors
R. Heimer: The Fd′ fragment of human γG immunoglobulin 81
Abstracts of papers for future publication 87
Notice 89

March

P. Johnson and *D. G. Marsh:* Allergens from common rye grass pollen (*Lolium perenne*)—I. Chemical composition and structure 91
P. Johnson and *D. G. Marsh:* Allergens from common rye grass pollen (*Lolium perenne*)—II. The allergenic determinants and carbohydrate moiety 101
R. A. Nelson, Jr., J. Jensen, Irma Gigli and *N. Tamura:* Methods for the separation, purification and measurement of nine components of hemolytic complement in guinea-pig serum 111
E. Rüde, O. Westphal, Esther Hurwitz, Sara Fuchs and *M. Sela:* Synthesis and antigenic properties of sugar–polypeptide conjugates 137
Abstracts of papers for future publication 153

May

Margaret D. Mamet-Bratley: Evidence concerning homogeneity of the combining sites of purified antibody 155
R. M. Stroud, M. M. Mayer, J. A. Miller and *Ann T. McKenzie:* C′2a^d, an inactive derivative of C′2 released during decay of EAC′4,2a 163

S. K. Seth and *P. C. Rajam:* On the mechanism of inactivation of antibody activity by cobalt-60 gamma radiation—I 177

J. H. Campbell and *A. M. Pappenheimer, Jr.:* Quantitative studies of the specificity of anti-pneumococcal polysaccharide antibodies, Types III and VIII—I. Isolation of oligosaccharides from acid and from enzymatic hydrolysates of S3 and S8 195

J. H. Campbell and *A. M. Pappenheimer, Jr.:* Quantitative studies of the specificity of anti-pneumococcal polysaccharide antibodies, Types III and VIII—II. Inhibition of precipitin reactions with oligosaccharides isolated from hydrolysates of S3 and S8 213

T. Goodfriend, G. Fasman, D. Kemp and *L. Levine:* Immunochemical studies of angiotensin 223

E. Ellen Nell and *P. H. Hardy:* Studies on the chemical composition and immunologic properties of a polysaccharide from the Reiter treponeme 233

Communication to the Editors

F. Borek and *A. M. Silverstein:* Specificity of delayed hypersensitivity reactions to nitroanilic acid–protein conjugates 247

July

L. Gyenes, J. E. Bata and *A. H. Sehon:* Degradation of rabbit antibodies with papain in presence of urea 251

M. J. Freeman and *A. B. Stavitsky:* Preparative electrophoretic separation of rabbit serum proteins and antibodies 257

A. E. Reif: An experimental test of two general relationships to describe the adsorption of antibodies by cells and tissues 267

K. Saha, F. Karush and *R. Marks:* Antibody affinity—I. Studies with a large haptenic group 279

Rose G. Mage, R. A. Reisfeld and *S. Dray:* An evaluation of the number of b4 allotypic determinants on rabbit γG-immunoglobulin using double-labeled, soluble complexes with univalent antibody fragments 299

N. O. Thorpe and *H. F. Deutsch:* Studies on papain produced subunits of human γG-globulins—I. Physicochemical and immunochemical properties of γG-globulin Fc-fragments 317

N. O. Thorpe and *H. F. Deutsch:* Studies on papain produced subunits of human γG-globulins—II. Structures of peptides related to the genetic Gm activity of γG-globulin Fc-fragments 329

Communications to the Editors

F. Borek and *Y. Stupp:* The degree of coupling and the immunogenicity of *p*-azobenzenearsonate conjugates of poly-L-tyrosine 339

H. L. Spiegelberg and *W. O. Weigle:* An *in vivo* assay to determine the ability of antibody to bind to antigen 341

W. R. Somers, R. A. Brown and *T. Makinodan:* The possibility of determining the absolute number of hemagglutinating antibody molecules in antisera 343

September

C. A. King and *G. E. Francis:* A study on the adsorption of antibody by chopped guinea-pig lung and subsequent fixation of antigen 347
L. J. Holt, N. R. Ling and *D. R. Stanworth:* The effect of heterologous antisera and rheumatoid factor on the synthesis of DNA and protein by human peripheral lymphocytes 359
K. Lindqvist and *D. C. Bauer:* Precipitin activity of rabbit macroglobulin antibody 373
A. Micheli and *H. Isliker:* Cleavage of γM-globulin by means of reducing enzyme systems 385
Helen Van Vunakis, Joan Kaplan, H. Lehrer and *L. Levine:* Immunogenicity of polylysine and polyornithine when complexed to phosphorylated bovine serum albumin 393
P. H. Mauer, P. Pinchuck and *B. F. Gerulat:* Antigenicity of polypeptides (poly-α-amino acids)—XVIII. Quantitative relationships among polymers containing glutamic acid, lysine and/or alanine and rabbit antisera 403
Communication to the Editors
F. Aladjem, M. T. Palmiter and *Fu-Wu Chang:* On the mechanism of the quantitative precipitin reaction 419
Erratum 425

November

J. E. Coe: Strain variations of mouse 7Sγ1 globulins 427
E. F. Gold, S. Cordes, M. A. Lopez, K. L. Knight and *F. Haurowitz:* Studies on chicken γ-globulins and hapten-specific chicken antibodies 433
Ruth Arnon and *Bilha Schechter:* Immunological studies on specific antibodies against trypsin 451
R. P. Tengerdy: Equilibrium and kinetic studies of the reaction between conalbumin and anticonalbumin 463
H. Baer, R. C. Watkins and *R. T. Bowser:* Delayed contact sensitivity to catechols and resorcinols. The relationship of structure and immunization procedure to sensitizing capacity 479
Communications to the Editors
K. Rajewsky: Rabbit antibody to pig lactic dehydrogenase reacting with the rabbit's own enzyme 487
Shlomo Ben-Efraim, Ruth Arnon and *M. Sela:* The immune response of inbred strains of guinea-pigs to polylysyl rabbit serum albumin 491
Complement Workshop 495

* Denotes a Communication to the Editors

† Denotes an Erratum

Aims and Scope

mmunochemistry involves the specialized disciplines of many fields of physical, biological and medical ences. Most investigators who are interested in immunochemistry are specialists in one or more of these ciplines and, as a result, immunochemical literature appears in a wide variety of journals and other types publications. The purpose of the Journal *Immunochemistry* is to eliminate the necessity for such dispersed blication by serving as a specific medium for material dealing with the chemical and physical aspects of munology and related problems. The Journal is not intended to replace any of the present journals dealing :h general immunology but is to be more specifically a chemical journal dealing with antigens and antibodies, ysical aspects of immune mechanisms and methodology or investigations related to such subjects.

Four types of articles will be published. The first and major type will be original experimental investigations t have not been previously published and that can be considered as complete rather than preliminary orts. Full length papers of theoretical material will also be considered for publication. The second type l be Communications to the Editors and will be limited to space which is equivalent to about 1000 words luding tables, figures or illustrations. These may be preliminary reports of original work (not abstracts), culative or theoretical material or a brief article of editorial nature dealing with some problem in immuno-emistry. Sufficient data or information must be presented to justify conclusions and must have the approval one of the members of the Editorial Board. The third and fourth types of material will be Book Reviews and mprehensive Critical Reviews of major problems of general interest. Both of the latter forms will usually by invitation only, but the Editors will also consider volunteer contributions of this nature at any time.

The first two or three years of this publication will be considered a period of initial growth and develop-nt. Consequently, some changes will undoubtedly be made during this period and the Editors welcome ggestions for modification. During this period, the Journal will be published quarterly.

Since this Journal is intended for international participation by investigators in the field of immunochemistry, nuscripts will be published in either English, French, German or Spanish. Pergamon Press will translate ssian manuscripts into English for review and if accepted, the publication will appear in English.

The contents of contributors shall be the sole responsibility of the Authors. Publication shall not imply e concurrence of the Editors or Publishers with the Authors' interpretations, conclusions or validity of data.

Notes for Contributors

Submission of manuscripts. Manuscripts should be sent to one of the Regional Editors. Contributions m France should be sent to Professor Bussard; those from Switzerland and the British Isles should be sent Professor Isliker. Manuscripts from other European countries, Australia and Africa may be sent to either the above two Editors. Manuscripts from the Eastern United States, Eastern Canada, Mexico, and South nerica, should be sent to Professor Karush; those from the Western United States, Canada and Asia should sent to Professor Campbell.

Form of contributions. Although manuscripts may be submitted in either English, French, German, anish or Russian, publication will be limited to the first four. Russian manuscripts will be translated and blished in English if approved. All papers must have an accompanying abstract in English as well as in the guage used for the article. All contributions must be submitted in typewritten duplicates and with lines least double spaced and with margins which provide sufficient space for notations. Submission of three pies of the manuscript will facilitate refereeing and rapid publication. Manuscripts dealing with experi-ntal work should be divided into major sections such as Introduction (optional), Experimental (with terials, Methods and Results) followed by Discussion, Conclusions and Bibliography. If a large number of previations are used, e.g., sRNA, EA, Ag, EEM, etc., it may be advisable to include a glossary defining such ms.

The title, with authors and their affiliations, should be placed on a separate page. On the same page give abbreviated title to be used as a running headline.

References should be indicated consecutively as they appear in the text by superscript arabic numbers th parentheses, e.g. Franklin[1]. The full references should be cited in a numbered list at the end of the per using the following style:

FRANKLIN E. C., FUDENBERG H., MELTZLER M. and STANWORTH D. R., *Proc. natn. Acad. Sci. U.S.A.* **48,** 914 (1962).

SMITH R. T., *Advances in Immunology* (Edited by W. H. TALIAFERRO and J. H. HUMPHREY) Vol. 1, p. 67. Academic Press, New York (1961).

Footnotes. Statements or references which do not fit into the text of the paper or literature references y be noted by the following symbols: *, †, ‡, §, starting afresh on each page, e.g., . . . crystalline trypsin *. otnotes should be typed at the bottom of the page on which they appear.

Tables. All tabular material, flow charts, etc., should be typed on a separate manuscript page and should intelligible without reference to the text. Headings should be concise, should clearly present the subject tter, and should be a part of the table. Footnotes to tables should also be placed on the same page and ignations should use some system such as superscripts [a, b, c,] etc., instead of numbers.

Graphs and illustrations. Figures and illustrations should be included separately and not as part of the t. They should be about twice the published size and be clearly marked on the back as to top, number and hor's name. Either the original or glossy prints may be used if care is taken in making good reproductions. icate on the manuscript where figures or illustrations should be inserted. Legends should be given on a arate page and clearly present enough information to make the figure understandable. The following ndard symbols should be used on line diagrams:

▲ △ ▼ ▽ ■ □ × + ● ○

General considerations. It is important to all concerned that a manuscript be carefully read for errors l clarity before sending to an Editor.

Reprints. Fifty reprints of each paper are supplied by the publisher free of charge and will be sent to the t-named author. Additional copies in multiples of 50 can be obtained at reasonable cost if ordered before blication, and an order form for this purpose will be sent to the author.

Proofs will be sent to the first-named author for checking. *Corrections to the paper at this stage must be restric-to typographical errors.* Other than these, any substantial alterations may be charged to the author.
